How to fill out your Visual Garden Reference Chart

To fill out your Guide you will need some information on the varieties you are planting. This includes the date you should plant the plants, how soon before planting outside to start the seeds inside, and how many days it will take to harvest from your plants. You can find this information on your plant label or seed packet.

STEP 1: Circle which season you are creating your plan for. You can include multiple planting seasons on the same graph if you desire (for example, if you plant peas in February and can also plant a fall harvest in September)

Season: Spring Fall Other		Typical Fina	ıl
Variety	Action Type	Jan	

Step 2: Write in the date of your first and last frost. This will determine your growing season.

5	Season: Spring Fall Other		Typical Fina	al Frost Dat	e in My Reg	gion: <i>4/1</i>	5			Typical Fire	st Frost Date	e in My Reg	ion: <i>11/15</i>		>
F	Variety	Action Type	Jan	Fels	Mar	Арт	iviay	Jun	Jul	Aug	Sop	Oct	Nov	Dec	

Step 3 If you are filling in the varieties instead of using the alphabetized list, add it under "Variety"

Season: Spring Fall Other		Typical Fin	al Frost Date
Variety	Action Type	Jan	Feb
	Sow Indoors		
Bell Pepper	Plant Outdoors		
	Harvest		
	Sow Indoors		
	Plant Outdoors		
	Harvest		
	Sow Indoors		

Step 4 Next start filling in your plant timing info. For our example, bell peppers need to be planted outdoors after the last frost, Fill in the box under the last frost date. Here, we filled it in with green.

eason: Spring Fall Other		Typical Fin	al Frost Dat	e in My Reg	ion: 4/1	5
Variety	Action Type	Jan	Feb	Mar	Apr	May
Makes Committee of	Sow Indoors		8			
Bell Pepper	Plant Outdoors					
	Harvest					
	Carriladaasa					

Step 5 Next, if you plant to start your own seeds indoors, figure out when you would start your seeds. Bell peppers need to be planted indoors 8 - 10 weeks before being planted outdoors. See the example here in orange.

on: Spring Fall Other		Typical Final Frost Date in My Region: 4/15								
Variety	Action Type	Jan	Feb	Mar	Apr	May				
	Sow Indoors									
Bell Pepper	Plant Outdoors									
	Harvest									
	C			9						

Step 6 Finally, mark how many days it will take for your plant to produce peppers, or the days until harvest. Peppers take about 90 days to harvest and will produce until the first frost. See this example in blue.

Season: Spring Fall Other	Typical Final Frost Date in My Region: 4/15					Typical First Frost Date in My Region: 11/15							
Variety	Action Type	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
Bell Pepper	Sow Indoors												
	Plant Outdoors												
	Harvest							N 1					

Step 7 If you would like to plan a second season, like a fall garden, you can add that to your chart as well. For this planting zone, fall peppers should be planted in mid-July, which means seeds would need to be started indoors 8 to 10 weeks before that, and will be harvested 90 days later. See these bars noted in this example.

Season: Spring Fall Other	Typical Final Frost Date in My Region: 4/15							gion: 11/15					
Variety	Action Type	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
Bell Pepper	Sow Indoors												
	Plant Outdoors												
	Harvest												

Step 8 Fill in the rest of your varieties using this same process and enjoy your quick visual reference guide!
